Combining Classification Schemes for Browsing and Faceted Navigation in a Resource Discovery System

Prof. Dr. Michael Mönnich

Overview

- About the Karlsruhe Institute of Technologie (KIT) and the KIT Library
- Introduction of RDS in Karlsruhe
- Subject classification used in Karlsruhe
- Usage of classification elements in Resource Discovery Systems

Karlsruhe Institute of Technologie (KIT)

- The Karlsruhe Institute of Technology (KIT) was founded October 01, 2009, by a merging the Research Center Karlsruhe and the University of Karlsruhe
- KIT bundles the missions of both precursory institutions: a university of the state of Baden-Wuerttemberg with teaching and research tasks and a large-scale research institution of the Helmholtz Association conducting program-oriented provident research on behalf of the Federal Republic of Germany

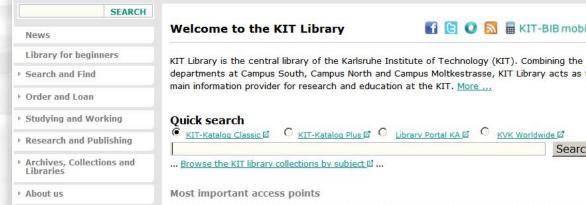

Data and Facts

Founded in	October 01, 2009
Employees	9.261
(2012)	Education and research: 5.809
	Infrastructure and services: 3.452
	Professors: 364
	Foreign guest scientists: 844
	Trainees: 445
Students	23.836
(Winter term 2012/2013)	Linguistics and Cultural Studies: 1.035
	Sports: 391
	Law, Economics and Social Sciences: 3.574
	 Mathematics, Natural Sciences: 8.116
	Engineering Sciences: 10.368
	Science of Art, other courses of studies: 403
	Detailed information in the <u>student statistics</u> .
Budget	University: Euro 397 million
(2011)	Federal funds: Euro 0
	State funds: Euro 224 million
	Third-party funds: Euro 174 million
	Research Center: Euro 392 million
	 Federal funds: Euro 229 million

• State funds: Euro 26 million

Resource Discovery System RDS

Choice of RDS

- Background:
- Since 2004 XOPAC was used as a search engine for books, journals, audio-visual media
- The aim of the RDS introduction was to improve indexing of e-resources, in particular of journal articles
- Requirements
 - 1 catalog for all resources
 - Good coverage of e-resources
 - High performance and 24/7 availability
 - Hosted solution (Software as a service)
 - Also suited for HsKA (University of Applied Sciences Karlsruhe)
 - Smooth transition for users (flexible layout)

- Volltext-Engine swish-e
- Datenbank PostgreSQL
- Programmiersprache PHP
- Betriebssystem Linux

X Highlights

Eine Entwicklung der

Karlsruhe

Universitätsbibliothek

Universität Karlsruhe (TH)

Universitätsbibliothek

- MAB2 als internes Datenformat
- Beliebige Suchaspekte
- Volltextsuche in bibliographischen Daten
- Performante Teilkatalogsuche
- Günstig, da keine Lizenzkosten für die Open Source Basiskomponenten anfallen

der IT-Abteilung der UB Karlsruhe zur Realisierung eines OPAC-Servers verwendet wurden. Die wichtigsten sind:

Maitara Infact c Vartrag vom 07 10 2004

Choice of RDS

- Evaluation of
 - Primo / Primo Central (Ex Libris)
 - Summon (Serials Solutions)
 - Discovery Service (EBSCO)
- 2011 decision for Primo / Primo Central (Ex Libris)
- April 2012 start of:
 - KIT Plus = metadata of Primo Central ("Plus" data) + data of all titles in SWB (including FBH, institutes) + local data from i3v lending system
 - KIT Catalog Classic = shows only the data for the titles in SWB
- Features
 - KIT Catalog Plus as the default entry to make the new eresources visible
 - Consistent sorting by relevance for short title lists
 - Facets combining for local and Primo Central Data

Selection Criteria for Plus

 Focus on KIT relevant sources (otherwise large numbers of hits)

Publishing Group:

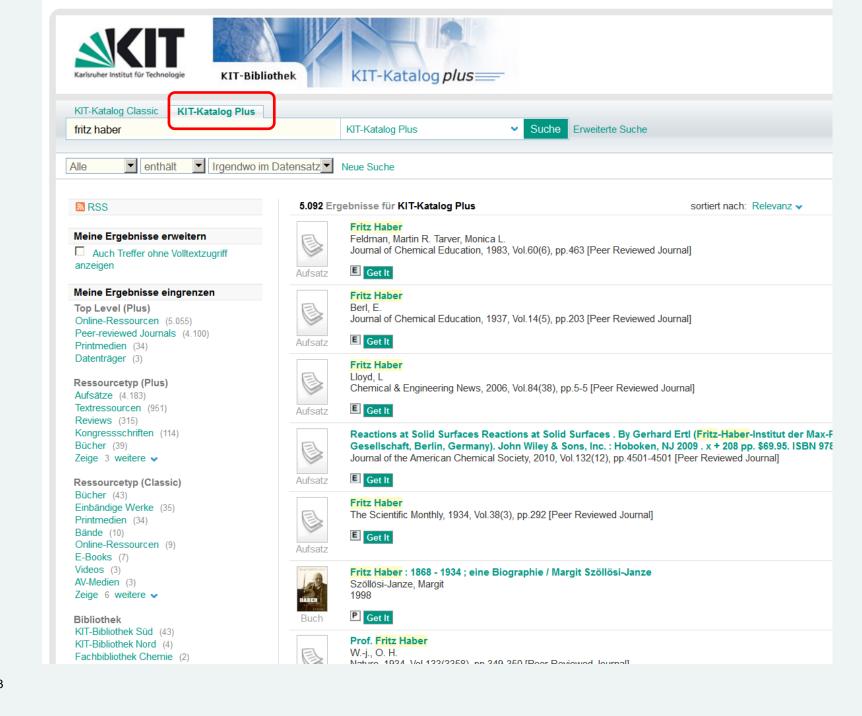

- Widest possible coverage of KIT licensed full texts
- Avoid duplicates (aggregators' caveat!)
- Substitute for professional databases?
- Avoid sources of poor data quality

	Avoid sources of poc	n data quality		
	Liste der Quellen in Plus (Primo Central)	National Institute of Standards &	American Association for the Advancement of	International Union of Crystallography
	Stand: 03.09.2012	Technology	Science	Maney Publishing
		SEG Research Collection	American Chemical	Mary Ann Liebert
	ACM Digital Library	(Society of Exploration	American Economic	MIT Press
	GeoRef (Ovid)	Geophysicists)	Association	Nature Publishing Group
	American Institute of Physics	SIAM Journals Online	American Geophysical	Organisation for Econor
	AIP Conference Proceedings	(SIAM: Society for	Union	Co-Operation and
	AIP Journals Delivery	Industrial and Applied	American Institute of	Development
	American Astronomical	Mathematics)	Aeronautics and	Sage Publications
	Society American Society	SPIE Digital Library	American Mathematical	SciELO
	of Mechanical Engineers	The Society for Information	Society	Society of Petroleum
	ASA Digital Library	The Society of Rheology	American Society of Civil	Engineers
	(Acoustical Society of	The Tire Society	Engineers	Thieme Publishing Grou
	America)		Annual Reviews	University of California

CAIRN

Directory of Open Acces

Society

KIT-Catalog Plus

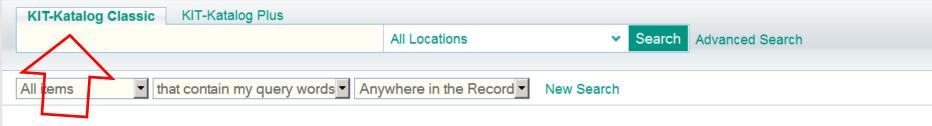

- Redesign in January 2013
- Results of usage tracking via javascript since July
- Pageviews
 - Which pages are accessed (Home, Hit List, full title)?
 - How many facets were active?
 - Which search terms are entered?
 - Which full title view was requested
 - KIT local or Primo Central?
- Click-Events
 - Which facets are clicked?
 - Which links are used?
- Which tabs are opened?
- Etc.

Results

- Most users start searching with one word in the KIT Catalog Plus
- Less than 10% change to the Classic Catalog
- The "advanced search" is used less than 8%
- Rarely more than two facets are required
- Less than 3 facets in 95% of all cases
- 90% of users click only 7 out of total 20 facets possible: type, publication date, top-level, library, language, subject, location
- Facets are almost never clicked away
- 90% of full-titles accessed are local KIT (not Primo Central!)
 - Majority of users is interested only in books
 - Search for journal articles is used much less than expected
- BUT: 30% of all retrieved full titles are e-resources!
- ExLibris' bX recommendation service was not used at all (but the local BibTip service)
- English website was used only by 0.1%

Contact

KIT Katalog Plus: Library Catalog Goes Search Engine

KIT-Katalog *plus*

KIT Katalog Classic offers 1 mio titles of books, journals and electronic media in libraries of the KIT.

KIT Katalog Plus has more content: Journal articles, conference proceedings, legal documents and more, 70 mio items in total. For books of and documents licensed by the KIT Library the *Get It* button takes you directly to the lending option (printed materials) or to the full text (electronic documents).

About the Plus-data

Plus-data are provided by Primo Central Index. The data are aggregated from different sources, therefore they are heterogeneous and not always accurate.

Subject Classifications Used in Karlsruhe

- We use several classification systems
- University library:
 - (Very old shelf classification 1870 1963 used in the closed stacks)
 - Old local classification 1964 1992
- Library of the Research Center: Local classification 1960 2011
 - KIT Library: New local classification (shelf classification)
 - 1978 1992 only in the reading rooms
 - since 1993 all open access holdings
- KIT Library: RSWK: Regeln für den Schlagwortkatalog (Rules for cataloguing by subject headings) since 1994

Managing Subject Classification Data in Primo RDS

XML in Primo

- Primo internally works with XML
 - Using a "pipe" Primo generates PNX
 - PNX = Primo Normalized XML
- Input is by default MARC-XML or MAB-XML
- We use a native natural-language XML instead
- We define special properties for search and facets

Example Record in XML: Title

Sex difference in diffuse malignant peritoneal mesothelioma.

Yan TD, Popa E, Brun EA, Cerruto CA, Sugarbaker PH.

Washington Cancer Institute, Washington, DC 20010, USA.

Abstract

BACKGROUND: Diffuse malignant peritoneal mesothelioma (DMPM) is rare and in t Female patients have been reported to have an improved survival outcome for reason

METHODS: The survival of 34 men and 28 women who underwent cytoredaction and DMPM was compared. Twenty-five clinicopathological variables were subjected to uni

RESULTS: The women had a 5-year survival rate of 63 per cent and median survival survival rate of 42 per cent, with a median survival of 32 months (P = 0.045). Women h and had less extensive peritoneal involvement at the time of cytereduction. Tumours in nuclear size (30 microm or less) and the chromatin pattern was more often granular that

Recommendations

- Recommendations can bridge the gap between local and external data
- No manual or intellectual input needed
- Works best if there is high usage
 - Ideally all libraries using Primo Central apply BibTip in order to reach the threshold value in short time
- Primo's Bx-recommendations work only within Primo Central data

Still a long way to go ...
