Figure 1. Corrected pair-production cross sections for a weak doublet with hypercharge $\frac{1}{2}$ at NLO, obtained using PROSPINO in the pure-Higgsino limit, for LHC14 (a) and FCC-hh (b).

The NLO pair-production cross sections for pure higgsinos at LHC14 and FCC-hh shown in figure 2 of our paper were underestimated by $\sim 30\%$. The corrected cross sections are shown in figure 1 above.
