In den letzten zwei Jahrzehnten gewannen Netzwerkanalysen und -darstellungen in vielen Wissenschaftsdisziplinen an Bedeutung und sind heute ein nicht mehr wegzudenkender Teil des wissenschaftlichen Instrumentariums. Dabei ist relativ schnell gesagt, was ein Netzwerk eigentlich ist: eine Menge von Knoten, die durch Kanten verbunden sind. Was Netzwerke allerdings im jeweiligen disziplinären Anwendungsfeld bedeuten können, ist weniger leicht gesagt. In diesem Reading Seminar nähern wir uns dem interdisziplinären Paradigma des Netzwerks mit Beispielen aus Linguistik, Psychologie und Soziologie. Teilnehmende erhalten eine Einführung in zentrale Konzepte der Netzwerktheorie und sammeln praktische Erfahrungen im Umgang mit Netzwerkdaten mit der freien Software Gephi. The course will be taught simultaneously at both Universities. Live lectures will either take place at UoC or at KIT and be streamed via Zoom to the respective other university. <b>Keep in mind the time difference between Greece and Germany - Greece is one hour ahead!</b> Because winter semesters between Greece and Germany deviate substantially, the course is condensed into <b>9 lectures of three hours each</b> to fit the time period during which the respective winter semesters do overlap. <b>KIT Students:</b> Please register properly for the course via the KIT campus system and also send an Email to <a href="mailto:Alexandros.Stamatakis@h-its.org">Alexandros.Stamatakis@h-its.org</a> to be added to the course mailing list. The exact lecture schedule and course material from previous semesters including links to the video lectures on youtube are available via the <a href="#">Teaching Page</a> . <b>Lecture day &amp; time:</b> Mondays at 08:45 German local time / 09:45 Greek local time	<b>Lecture (V)</b> Stamatakis, Alexandros

In lectures, theoretical knowledge and fundamentals of structured system design and modular material handling are taught. There will be a written exam at the end of the lecture unit.  In parallel, a practical workshop takes place throughout the semester. For this, small group of students design and implement a mechatronic intralogistic system using industry-related robotic hardware and software to accomplish a given material flow task.  Registration takes place via the ILIAS course and the poll contained therein. The course is exclusively for mechatronics students and number of participants is limited.	<b>Lecture / Practice (VÜ)</b> Furmans, Kai Sax, Eric

2500081 English	<b>Probabilistic Time Series Forecasting Challenge</b>  Blended (On-Site/Online) <b>Organizational topics</b> <b>Short description</b> In this data science project, students make and evaluate statistical forecasts in a realistic setup (involving real-time predictions and real-world time series data). A kick-off meeting will take place in mid October. During the semester, there will be a weekly meeting in which students and instructors discuss the current state of the forecasting challenge. <b>Prerequisites</b> Students should have a good working knowledge of statistics and data science, including proficiency in a programming language like R, Python, or Matlab. Knowledge of time series analysis is helpful but not strictly required. Motivation and curiosity are particularly important in this course format that requires regular, active participation over the whole semester. Please note that the number of participants is limited due to the interactive course format. Application takes place via the Wiwi portal, where further information is available.	<b>Project (PRO)</b> Bracher, Johannes Koster, Nils Lerch, Sebastian
	<b>Examination rules</b> The project seminar counts for 4.5 credit points (Leistungspunkte). Examination is via an alternative exam assessment (§4(2), 3 SPO). Necessary conditions to pass the course: 1) Weekly submission of statistical forecasts during the semester (excluding the Christmas break), 2) Submission of a final report (10-15 pages) at the end of the semester, describing the forecasting methods and their statistical evaluation. Grading is based on the final report.
