Milsom

In the version of the article initially published, in the source data for Extended Data Fig.5a, a copy–paste error meant that for one recipient mouse, the peripheral blood cell values at the 20 week time point had been duplicated as the 24 week time point when the latter should have been blank. The Source Data file and figure have now been corrected, and the original, uncorrected figure is available for comparison in the Supplementary information accompanying this notice. This correction has been made to the HTML and PDF versions of the article.
